ABOUT US

C2 Design were founded in 2015 by Architectural and Interior designer, Rachel Cleverly. Since then, we have quickly grown and established ourselves in this booming building scene. Rachel is now backed by a team of draughters and designers, working together to create beautiful spaces for a wide range of clients. Fast and accurate turnaround is the key to our success.

WHY US?

When you have a project ahead of you, whether it be a new home, renovation or commercial venture, you can trust us to deliver something to be proud of. We are passionate about creating stylish, practical solutions which meet your brief and exceed your expectations. We will ensure your project runs smoothly so you can sit back and enjoy seeing your dream rising from the ground to completion.

“Creating stylish, livable designs that exceed your expectations”

We have recently opened a South Island Branch

EMILY LORD
Senior Architectural Designer

OUR PROCESS

1. Client Meetings

To begin the process, we meet with you on site to discuss your ideas and needs. This helps us to gain an understanding on the scope of your project. We then go away and begin to gather the necessary information for us to create a concept for you.

2. Concept Design

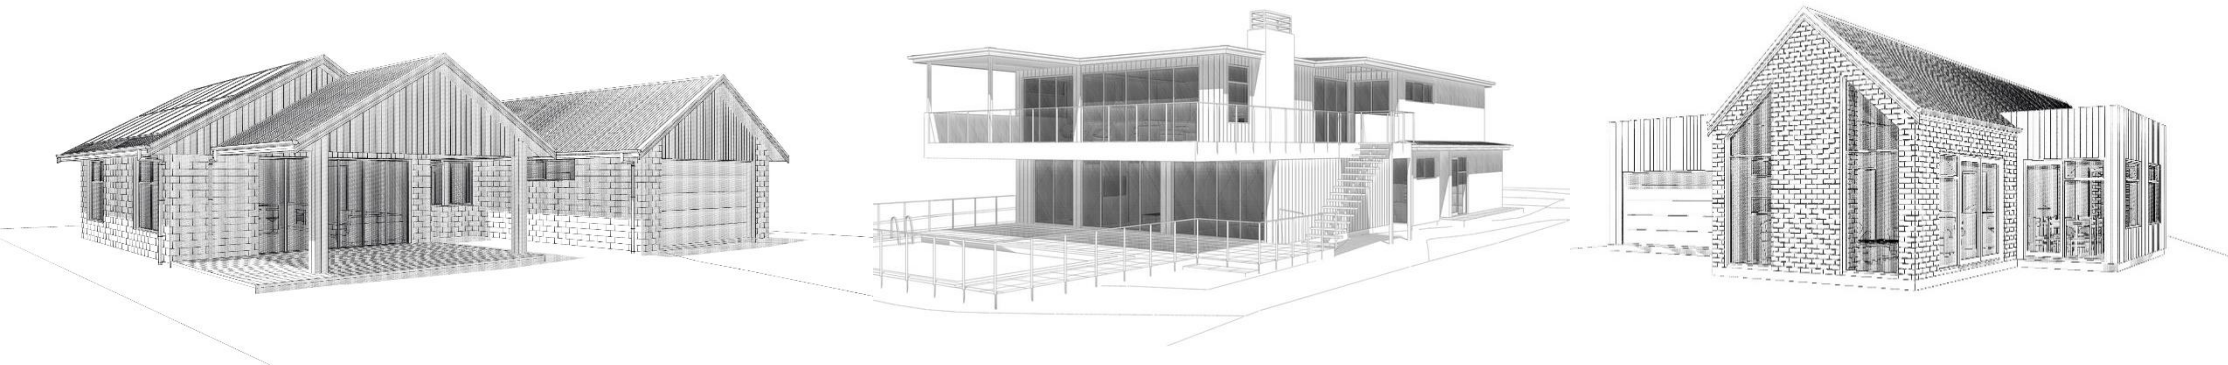

Once a concept plan is created, we present this to you for your feedback. We then discuss the aspects of the plan that you like and also the changes you may want to make. We then refine this until it is just right.

3. Detailed Design

When we have your approval on the concept, we then begin to turn these into working drawings. These are detailed drawings that show how the project is to be constructed. Once completed, we will then present these to you again for final checking.

4. Consents

After you give us the go ahead, we then collate all the drawings and documentation and will complete an application for building consent (and Resource Consent if required). When your building consent is accepted, construction may begin.

WHAT WE DO

COMMERCIAL

Thoughtfully designed commercial spaces

INTERIORS

Interior design and commercial fit outs

RESIDENTIAL

Architecturally designed homes

RENOVATIONS

Interior and exterior makeovers

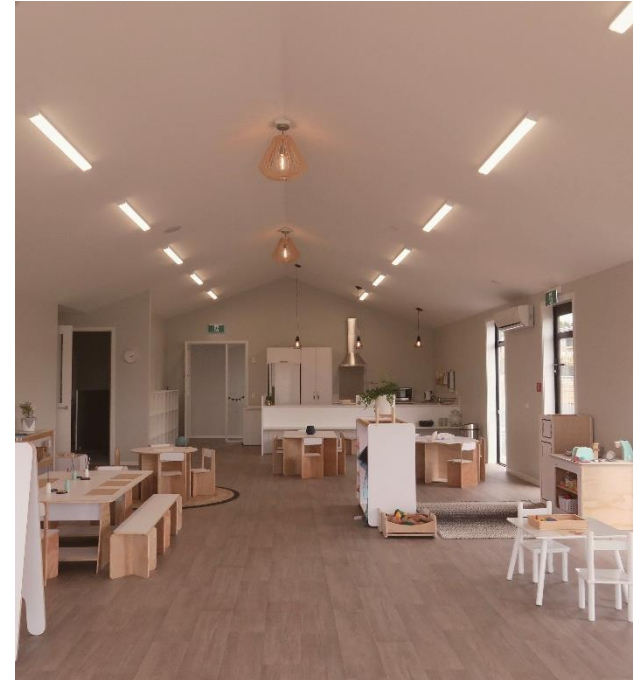

OUR PROJECTS

COMMERCIAL

Imagine That, Preschool

380sqm single level preschool. This building was designed to be functional, spacious and light. It has floor to ceiling windows throughout and large sliding doors that open out onto vast decked areas, creating plenty of places for children to play - no matter the weather.

Twinkle Twinkle Childcare

The goal when designing this two storey preschool was to make it a modern and welcoming place for children, families and staff. Through practical design we achieved light, open and comfortable spaces for all to enjoy. It features large windows and doors which open up onto an exciting outdoor play area.

Summerhill Golf Kiosk

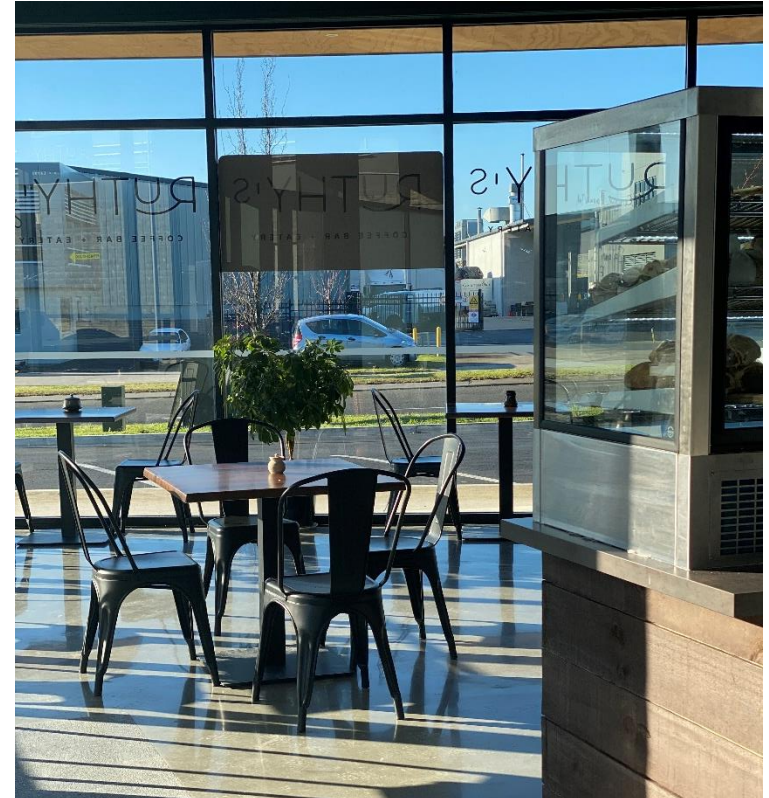

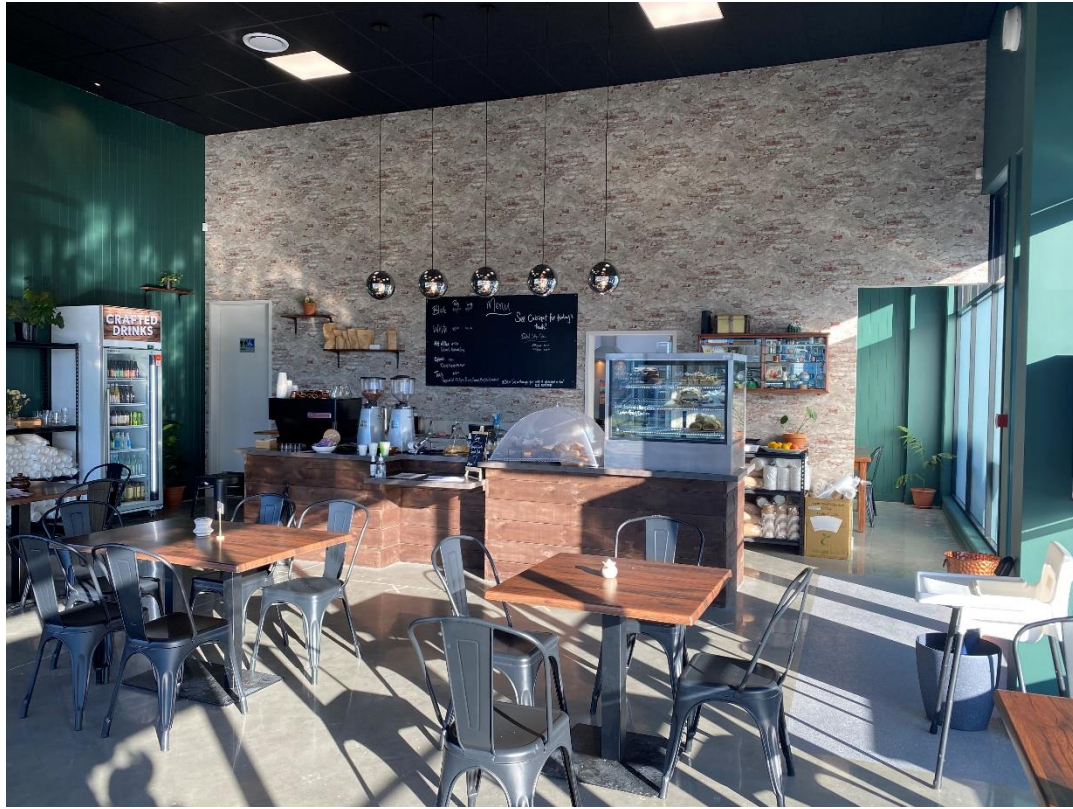

This small but functional building provides an office, teaching area and player's toilets. The building has quickly become a hub of the course. It has a mix of durable metal cladding with feature timber screening. A covered outdoor seating area provides the perfect place to relax after a round of golf.

Ruthy's Cafe

C2 Design were in charge of the interior fit out of this new café in Tauriko. The café was opened in memory of a special lady named Ruthy. The brief was to create a warm and welcoming environment where everyone can come and enjoy great food and coffee.
